NKT Photonics A/S expands global distribution partners

Birkerød, Denmark (February 11th 2010), NKT Photonics A/S – the industrial manufacturer of supercontinuum sources and fiber lasers – proudly announces the expansion of its global distribution partner’s network with these companies:

UK – Photonic Solutions Plc.

Italy – Crisel Instruments Srl.

BeNeLux – Applied Laser Technology

Japan – Opto Science Inc.

Due to the considerable market growth in the above mentioned territories within NKT Photonics product range and the consequent growing customer interest, NKT Photonics decided to enlarge its professional distribution network. It has been essential to establish partnership with reputable and experienced companies to ensure customers always will have quick access to local and dedicated sales and technical support.

Photonic Solutions, Crisel Instruments, Applied Laser Technology and Opto Science will represent NKT Photonics in selling and supporting the supercontinuum sources **SuperK** and the single frequency **KOHERAS** fiber laser product families. These products are already world renowned due to their cutting-edge technology and reliable performance.

“It is a great pleasure for us to see the rapid growth of our products globally. We are proud to be able to work with such skilled and dedicated partners as Photonic Solutions, Crisel Instruments, Applied Laser Technology and Opto Science” says Chuong Tran, VP of Sales and Marketing, NKT Photonics.

A list of the entire global distribution partners can be found at our website

About NKT Photonics A/S

NKT Photonics A/S designs and manufactures commercial and industrial class specialty microstructured fibers and high power fiber amplifiers. The company also designs and manufactures fiber-based industrial systems such as supercontinuum lasers and ultra precise DFB fiber lasers. The mentioned products are produced under the brand names CRYSTAL FIBRE, aeroLASE™, SuperK™ and KOHERAS™. These systems are commercially deployed in material processing, bio-photonics, metrology, optical sensors, coherent communications, test and measurement, high resolution spectroscopy and LIDAR markets. NKT Photonics A/S is wholly owned by the Danish industrial conglomerate NKT Holding A/S.

Photonic Solutions Plc.

Photonic Solutions was established in March 1999. We are now recognized as the leading optoelectronics companies in the UK with an impressive track record of success. Photonic Solutions is staffed by a group of highly qualified optoelectronic specialists where 50% are educated to PhD level. We offer appropriate solutions thanks to a wealth of experience across a wide range of disciplines. Products from the world's foremost manufacturers include: Supercontinuum sources, single frequency fiber lasers, pulsed solid state lasers, cw/pulsed diode lasers, OPA's, ultrafast, DPSS, gas and dye lasers.

About Crisel Srl.

Crisel Instruments was incorporated in 1994 by a group of optical and electro-optical scientists and engineers with over 25 years of experience on designing and developing instrumentation in scientific and high-tech industrial communities. Crisel Instruments is today a leader company in the Italian electro-optic market, where we specialize in physical science imaging and spectroscopy, cellular biology and custom electro-optic systems. We don't see our company only as a reliable source for state of the art devices and systems, but as a consulting team offering a thorough understanding of our customer's experiments. November 2005 Crisel Instruments got ISO 9001:2000 compliance certificates for Design and Trading of Electro-optical equipments.

About Applied Laser Technology (ALT)

ALT supplies lasers, fiberoptics, products for nanopositioning and fine-mechanical components for industry, Sciences and research. The company is serving customers in the entire BeNeLux with products of leading manufacturers from Europe and the United States. ALT strongly values a personal approach towards its customers. Key-values are thorough knowledge of the product and the end-user application, swift service and no-nonsense after-sales support. Founded in 1986, ALT has become a major player in the Electro-Optics market in the BeNeLux.

Opto Science Inc.

Founded in 1987, Opto Science is one of the largest distribution company dedicated to photonics in Japan. With more than 20 years experience Opto Science offers its customers not only products from world's most innovative and reliable manufactures but also professional and efficient services. Our customer's portfolio includes large OEM industrial companies and distinguishes researchers from national laboratories and universities within the bio-sciences and photonics areas.
